

S/MIMEv?

-8550bis & -8551bis

IETF 126 - Vienna, Austria

Blake Ramsdell & Sean Turner

Document Status

WG Birthed Monday!

Clone of individual I-D.

Work begins!

ToDo: Lots (Editorial)

Name Change: S.MIME v4 now, but what version?

Update references.

Back tick all the things!

ToDo: Technical

Falco Attack Mitigation Options; see [-cms-euf-cms-signaData](#):

1. Require signed attributes (Content Type, Signing Time, and Message Digest) & keep using `id-data` Content Type
2. Require signed attributes (same as 1) and use `mimeData` Content Type

Except for backward compatibility:

- Deprecate `EnvelopedData`
- Deprecate RSA Encryption

Use '08 ASN.1 module

Others; see [GH Issue](#)

Add PQ Algs

Make the Mandatory to Implement (MTI)?
